CLEAN COPY OF AMENDED CLAIM

1. A teleconferencing robot, for enabling a remote conferee to project a sense of presence into a group meeting, the teleconferencing robot comprising:

a base;

a video monitor movably mounted to the base for receiving and displaying an image of the remote conferee;

a video camera movably mounted on the base;

control means mounted on the base for moving the video monitor and video camera in response to an input control signal; and

wherein said video monitor and video camera move in response to said input control signal to enable the remote conferee to project a sense of presence into the group meeting.
